

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

EDITORIAL NOTE

In Number 6, Volume XXVIII (1920), of the *Journal of Geology*, it was announced that, because of the extremely high cost of printing, it would be necessary to limit Volume XXIX (1921) to six numbers. This announcement was made with great regret. It is therefore with correspondingly great pleasure that the *Journal* now is able to make the announcement that, through the generosity of one of its associate editors, Dr. R. A. F. Penrose, Jr., formerly connected with the Department of Geology in the University of Chicago, the announced reduction in the volume will not be necessary. During the year 1921, the *Journal* will continue to be published semi-quarterly, as heretofore. The editors of the *Journal* and the University appreciate deeply the generous support of Dr. Penrose. Their feeling will be shared, we believe, by all who are interested in the science of geology.

Certain changes in the editorial policy of the *Journal* have been adopted. These are printed near the bottom of the inside page of the first cover of this number, and the attention of contributors is called to them.
